

## *Summarization-and-refinement Strategy: Prompt for Zero-Shot Method Name Generation*

You are an experienced software developer. I will provide you with a comment corresponding to a function code. Please generate a high-quality function name based on the provided comment. Note that a high-quality function name should follow the following coding conventions:

- (1) Clearly convey the primary purpose of the function and accurately reflect its core functionality;
- (2) Follow the naming conventions of the programming language, such as camelCase for Java and snake\_case for Python;
- (3) Be concise yet descriptive, avoiding unnecessary words or redundancy;
- (4) Avoid using generic or ambiguous terms and ensure clarity and readability.

The following is a function code comment:

*<Code Summarization>*
